SUMMARY

Software Engineering student graduating in 2027 with 3+ years of experience building and shipping mobile, web, and desktop products. Sole developer of cross-platform applications spanning iOS, Android, web, and Windows, with strengths in Flutter/Dart, Firebase, TypeScript/Node.js, SQL/NoSQL, native integrations, automated testing, and end-to-end delivery.

EDUCATION

Bachelor of Software Engineering (Hons) | Sunway University / Lancaster University **Expected 2027**
Subang Jaya, Malaysia | Relevant Coursework: Software Architecture, Data Structures, Mobile Development, Databases, UI/UX Design
Foundation in Information Technology | Multimedia University **May 2023 - Jul 2024**
Cyberjaya, Malaysia | Programming, Data Structures, Networking, and Web Fundamentals

TECHNICAL SKILLS

Languages: Dart, TypeScript, JavaScript, Python, SQL, HTML/CSS
Mobile & Frontend: Flutter, Riverpod, Swift/SwiftUI, Kotlin, WidgetKit, Android RemoteViews, Electron, WebGL2
Backend & Data: Firebase, Firestore, Cloud Functions, Node.js, REST APIs, Supabase/PostgreSQL
Cloud, AI & Services: Vertex AI, Gemini, MediaPipe, RevenueCat, Remote Config, App Check
Tools: Git/GitHub, Xcode, Figma, Godot Engine
Spoken Languages: English (Fluent), Arabic (Native)

SELECTED PROJECTS

Bupples - Social Expense App | Flutter, Firebase, Vertex AI, RevenueCat | [GitHub](#) | [Live App](#) **Feb 2026 - Present**
• Built and launched a social expense-sharing product across iOS, Android, and web as sole developer, owning product design, Flutter development, Firebase backend architecture, security, and release workflows.
• Engineered a cent-exact ISO 4217 multi-currency ledger with idempotent Cloud Functions and Firestore Security Rules; integrated Gemini receipt extraction, real-time chat, RevenueCat subscriptions, App Check, and Remote Config.

Adelante - Widget-First Motivation App | Flutter, Swift, Kotlin, Firebase | [GitHub](#) **Jun 2026 - Present**
• Built a privacy-first motivation app with native WidgetKit/SwiftUI and Android RemoteViews widgets for Home Screen, Lock Screen, and StandBy - without accounts, analytics, or ads.
• Designed a Firestore and scheduled Cloud Functions content pipeline with offline caching, deduplication, quality scoring, and strict filtering; validated reliability with 80 automated tests.

Photoshoot - Photobooth App | TypeScript, Electron, WebGL2 | [GitHub](#) | [Live App](#) **Jun 2026 - Present**
• Built and deployed a Windows and browser photobooth with single-shot, four-shot strip, and video modes, plus 17 real-time GLSL effects and 8 on-device MediaPipe face effects.
• Engineered a local-first Electron/WebGL2 architecture with context isolation, sandboxing, strict CSP, and Firebase Hosting, keeping camera processing and captures on-device.

Tajweed Interactive Web App | Frontend, UI/UX | [GitHub](#) **Sep 2025 - Present**
• Redesigned navigation, information architecture, and lesson flows for a Quranic recitation platform, improving discoverability, accessibility, and visual hierarchy.

Fallen Asteri - 2D Platformer | Godot Engine, GDScript | [GitHub](#) **Apr 2024 - Jun 2024**
• Implemented player movement, combat, and scene transitions in a 2D platformer; structured the Git/GitHub repository for team development.

EXPERIENCE & LEADERSHIP

Digital Marketing Executive | Sunway Cybersecurity Club | Subang Jaya, Malaysia **Jan 2026 - Present**
• Planned 10+ LinkedIn posts and campaign assets, coordinating the club's content calendar for recruitment, events, awards, and industry activities.
• Produced recruitment, industry-visit, award-announcement, and event-recap graphics in Canva while collaborating with the committee and external partners.
