SUMMARY

Software Engineering undergraduate graduating in August 2027, focused on mobile and backend product engineering. Shipped a monetised, multi-currency Flutter app on iOS and Android with production Firebase infrastructure and AI-assisted receipt workflows.

EDUCATION

Sunway University in partnership with Lancaster University Bachelor of Software Engineering (Honours) CGPA: 3.40/4.00	Sep 2024 - Aug 2027 (Expected)
Multimedia University Foundation in Information Technology	May 2023 - Jul 2024

TECHNICAL SKILLS

Primary Languages: Dart, TypeScript, JavaScript
Working Knowledge: Python, Java, GDScript
Mobile: Flutter, Riverpod, SwiftUI, Kotlin, WidgetKit, Android RemoteViews
Backend & Cloud: Firebase, Firestore, Cloud Functions, Node.js, REST APIs, Remote Config, RevenueCat
Engineering Practices & Tools: Git/GitHub, automated testing, Firebase Emulator Suite, Firestore Security Rules, Xcode, Electron, WebGL2, MediaPipe

SELECTED PROJECTS

Bupples Social Expense-Sharing App Flutter, Firebase, TypeScript, Vertex AI, RevenueCat App Store Google Play Landing Page GitHub - Shipped Bupples to the Apple App Store and Google Play as sole developer, owning Flutter delivery, Firebase architecture, subscriptions, and releases. - Engineered exact money logic using integer minor units and independent per-currency ledgers, with deterministic receipt allocation and balances that reconcile within each currency. - Integrated Gemini 2.5 Flash through Vertex AI to extract receipt line items, quantities, tax, service charges, discounts, merchant details, and currency into structured data. - Architected server-authoritative Firebase controls with 71 Cloud Functions, membership- and owner-scoped rules, server-written audit logs, and Remote Config kill switches, maintenance mode, and version gating.	Feb 2026 - Present
Adelante Widget-First Motivation App Flutter, SwiftUI, Kotlin, Firebase Landing Page GitHub - Developed a privacy-first iOS and Android app with native WidgetKit/SwiftUI and RemoteViews integrations for Home Screen, Lock Screen, StandBy, and iPad widgets. - Designed a scheduled Firebase content pipeline with offline caching, deduplication, quality scoring, and strict filtering; validated core logic with 80 automated tests.	Jun 2026 - Present
Photoshoot Local-First Photobooth TypeScript, Electron, WebGL2, MediaPipe Live App GitHub - Created and deployed a Windows and browser photobooth with photo, strip, and video modes, 17 real-time GLSL effects, and 8 MediaPipe face effects processed locally. - Hardened the Electron renderer with context isolation, sandboxing, strict Content Security Policy, and zero-trust theme and filter imports, keeping all camera processing and captures local.	Jun 2026 - Jul 2026
TEAM & ACADEMIC PROJECTS	
Fallen Asteri Team 2D Action-Adventure Godot, GDScript GitHub Playable Demo Collaborated through branches and merged pull requests to implement combat, boss behaviour, maps, animations, and save/load UI; helped ship a playable release on itch.io.	Apr 2024 - Jun 2024
Chess Training Page Team Web Project HTML, CSS, JavaScript GitHub Redesigned the home and contact flows and consolidated front-end styles and scripts, improving navigation, visual consistency, and maintainability across the team-built site.	Jul 2025
Tajweed Collaborative Quranic Learning Platform Frontend, UI/UX Live App Designed and implemented the complete user interface, navigation, and lesson flows, establishing a consistent visual system and clearer learning experience across the live platform.	Sep 2025 - Present

LEADERSHIP & ACTIVITIES

Sunway Cybersecurity Club Digital Marketing Executive Produced at least 10 LinkedIn posts and campaign assets for recruitment, events, awards, and industry visits, coordinating delivery with committee members and external partners.	Jan 2026 - Present
